Introduction

Purpose

The purpose of this document is to describe the requirement specification for the web site "JuiceStar".

The intended audience for this document is Bob and the grader.

First it is the contract between you and the client. Second it is for the developer of the site. Two primary goals are:

1. *Client gets a very good understanding of what you will be delivering.*
2. *Developer has a very good understanding of what they are going to create.*

Definitions, acronyms, and abbreviations

Sample for the client:

HTML – Hypertext markup language – used to define your content.

PHP – Personal Home Page – language that helps to customize html.

CSS – Cascading Style Sheets – used to define the look of a web site.

W3 Validation – refers to both Html and CSS validation tool provided by the W3c.org. the html validator is located at:

http://validator.w3.org/

with the CSS validator located at:
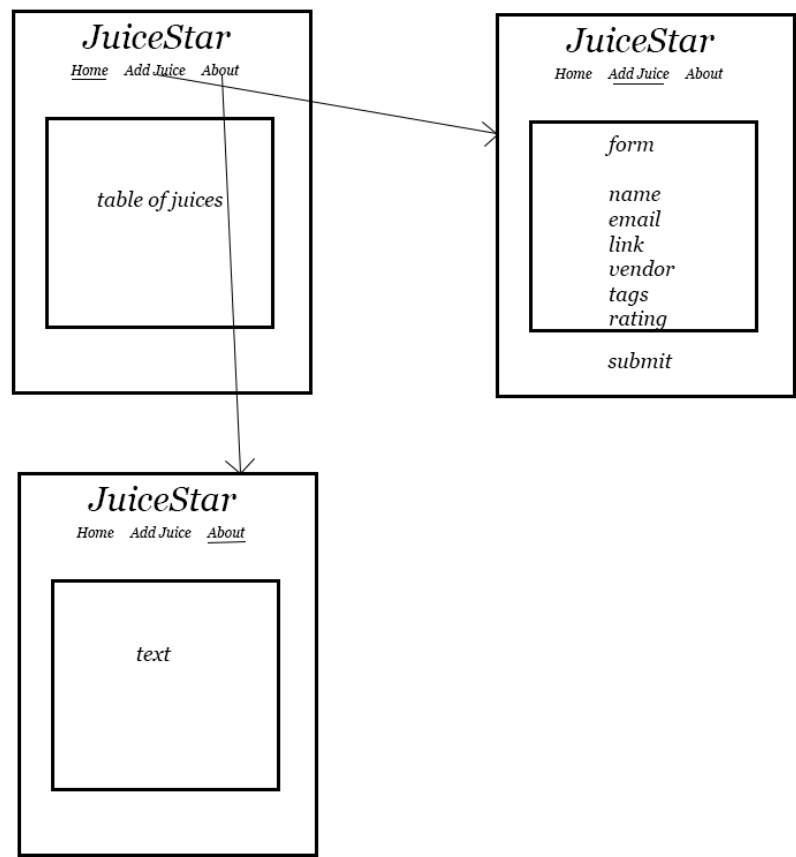

http://jigsaw.w3.org/css-validator/

Overall Description

The purpose of this website is to provide a place for people to post and rate flavors of e-cigarette juice, so that other users can find quality e-juice to purchase. This site uses a star rating system which is implied by the title. Users are also able to tag the juice (ie. 'fruity', 'lemon', 'orange') and upload photos of it.
